

Name: Luke Buonanno

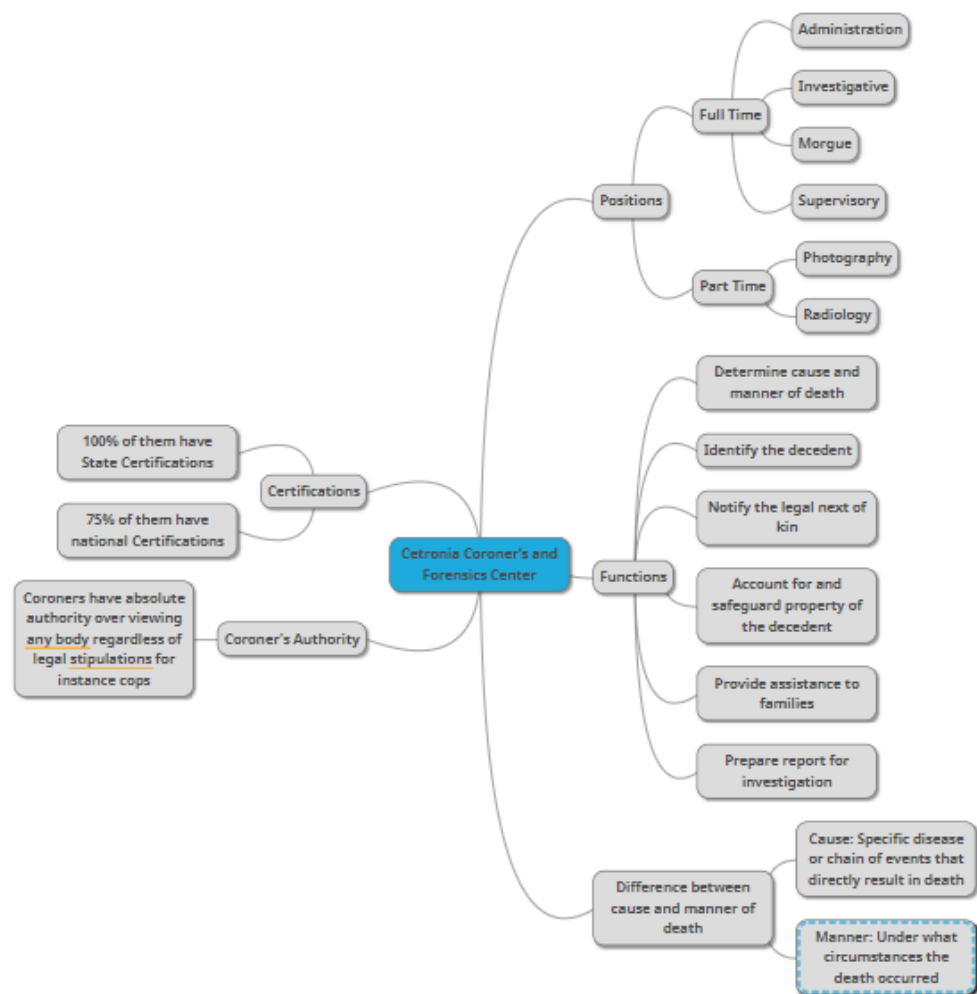

Date: 1/13/2024

Cetronia Coroner's and Forensics Center

State Certified and some National Certifications for Coroners

One quote that stood out to me is that almost 90% of all deaths are non-homicide related.

One specific thing that will be most beneficial to my career goals is the knowledge of what cases look like and what coroners look for in order to determine whether they need to do an autopsy or other procedures.
