Bank: 24/7 open

whole blood

Packed red blood cells

platelets

plasma - freezer

Forward testing Red cells

Reverse testing plasma

2. One quotable quote that stood out to me most was “O+ make up 38% of American’s Blood types.” It stood out to me because it is a very useful statistic to remember.

One specific thing that might be useful to my future endeavors would be the ability to manage resources very tightly. Engineering often comes with limits and difficulties, and being able to manage the resources I have and problem solving some of the difficulties that arise.

3.
